Work Experience

vdjkn @ kjk

Mar 2025 - Present

Developed and deployed a high-availability, scalable microservice architecture using Spring Boot, Kubernetes, and Docker, resulting in a 30% reduction in application latency and a 20% increase in throughput. Leveraged Agile methodologies (Scrum) to deliver five features ahead of schedule, exceeding sprint velocity targets by 15%. Implemented automated testing using JUnit and Selenium, achieving 98% code coverage and reducing bug reports by 40%. Proficiently utilized relational databases (PostgreSQL) and NoSQL databases (MongoDB) to optimize data storage and retrieval.
